Muster Rolls and the Camp Lejeune Litigation

- The Muster Rolls have the potential to impact up to two thirds of the clients involved in the Camp Lejeune litigation.
- Having the Muster Roll database would allow verification of time and place for many of the clients who were at the base prior to 1975 without having to physically review their actual file.
- For example, with a base of 250,000 clients and having to spend 1/2 hour with a file review would require 125,000 hours of labor
